CONFLICT SIDES

2020-2026

1,271,374 DEATHS / 85 CONFLICTS

This volume contains the 2020-2026 annual pages of the selected Conflict Sides atlas. It follows conflicts active in 2026 with at least 1,000 deaths in 2007-2026. Each annual page appears in one decade volume only. Years with no deaths are omitted.

One dot represents one death. The opening spiral summarizes this volume: named-side deaths follow the outer edge inward, beginning with the greatest loss in black. Civilian and unknown deaths appear in separate blocks below it. Annual pages use the death-circle poster design, with the smaller side black at the top and the larger side red.

Conflicts with exclusively civilian deaths are reserved for a separate civilian deaths book and excluded here, including from the overview. Civilian and unknown deaths within mixed conflicts remain with those conflicts. A second circle, when used, leaves the already-counted side deaths empty.

Uppsala Conflict Data Program / GED 26.1 and loaded candidate releases. Latest event revisions replace earlier records with the same event ID. Categories sum to the source best estimate. The 2000s volume begins in 2001, preserving the atlas scope of this century.

Use the PDF bookmarks to navigate conflicts and years. Sources: https://ucdp.uu.se/downloads/ Project: https://github.com/SJAH9/war-maps-project
